### **DETAILED ACTION**

#### Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-136, are drawn to a projection system which illuminates/directs at least to different dot locations simultaneously on the viewing surface, classified in class 348, subclass 744.
  - II. Claims 138-139 are drawn to a projection system which compensates for differences in positioning of the pattern of spots/adjusting for pointing errors, classified in class 348, subclass 744.
  - III. Claims 140-151 are drawn to a projection system which ensure accuracy in the horizontal registration on a screen of the spots, classified in class 348, subclass 744.

Inventions I, II and III are patentably distinct as indicated above. Although, the three distinct inventions are classified in the same class/subclass, this subclass is a generic subclass for video projection devices and thus each distinct invention would also require additional subclasses/keyword searching relating to the particular invention (i.e. at least 2 different dots locations simultaneously illuminated, accuracy in the horizontal registration). Thus each group has a separate status in the art, same classification but each group has divergent subject matter, requires divergent fields of search, thus being restrictable.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised to elect one of the groups above for examination. In the event the applicant traverses the restriction, the applicant must still elect a group and present arguments directed towards the traversal.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Yenke whose telephone number is (571)272-7359. The examiner work schedule is Monday-Thursday, 0730-1830 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Supervisor, John W. Miller, can be reached at (571)272-7352.

## Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

#### or faxed to:

(703) 872-9314

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703)305-HELP.

Application/Control Number: 10/086,272

General information about patents, trademarks, products and services offered by the United States Patent and Trademark Office (USPTO), and other related information is available by contacting the USPTO's General Information Services Division at:

800-PTO-9199 or 703-308-HELP

(FAX) 703-305-7786

(TDD) 703-305-7785

An automated message system is available 7 days a week, 24 hours a day providing informational responses to frequently asked questions and the ability to order certain documents. Customer service representatives are available to answer questions, send materials or connect customers with other offices of the USPTO from 8:30 a.m. - 8:00p.m. EST/EDT, Monday-Friday excluding federal holidays.

For other technical patent information needs, the Patent Assistance

Center can be reached through customer service representatives at the above

numbers, Monday through Friday (except federal holidays) from 8:30 a.m. to 5:00

p.m. EST/EDT.

The Patent Electronic Business Center (EBC) allows USPTO customers to retrieve data, check the status of pending actions, and submit information and applications. The tools currently available in the Patent EBC are Patent Application Information Retrieval (PAIR) and the Electronic Filing System (EFS).

Art Unit: 2614

PAIR (http://pair.uspto.gov) provides customers direct secure access to their own patent application status information, as well as to general patent information publicly available. EFS allows customers to electronically file patent application documents securely via the Internet. EFS is a system for submitting new utility patent applications and pre-grant publication submissions in electronic publication-ready form. EFS includes software to help customers prepare submissions in extensible Markup Language (XML) format and to assemble the various parts of the application as an electronic submission package. EFS also allows the submission of Computer Readable Format (CRF) sequence listings for pending biotechnology patent applications, which were filed in paper form.
